

# DIGITAL INTEGRATED STEREO AMPLIFIER - ROMA 54DC+

Synthesis is set to release a new digital integrated stereo amplifier ROMA54DC.

The sound is complete, airy, dynamic, lively, and incredibly musical. The purity of human voices and accuracy of instruments is breathtaking. The Roma54DC provides a fast, dynamic presentation without the dryness and sterility of other Class D designs. This is due to the particular configuration of the input stage and the natural sound it produces. Resolution, transparency and detailed sound are above and beyond that which one would expect from an amplifier. The Roma 54DC+ has USB "B" type, DSD 5,6MHz and optical input. 32Bit resolution gives you a fantastic sound stage and beautiful sound reproduction.

## Roma 54DC/54DC+

High power hybrid integrated amplifier

Inputs (54DC): 2 Line  
1 Phono

Dig. inputs (54DC+): 1 Optical Toslink,  
1 USB "B" type Windows / Mac / iOS /  
Android compatible

Max Resol. (54DC+): 24Bit 192KHz (Optical)  
32Bit 384KHz (USB)  
DSD up to 5,6 Mhz (USB)

Output pow (each ch): 100W (8ohm) - 170W (4ohm)

Preout: Volume controlled

Headphone out: >32 ohm

Sensitivity: 200mV

Signal/Noise ratio: >90dB (A-weight)

Remote controller: included

Power consumption: 400W max

Dimensions: (w,d,h) 260x380x95mm

Weight: 6 Kg
